## Davatar - Dynamic Avatar

Hits: 1,310

**Description:** Davatar which means Dynamic Avatar, is a Dynamically Generated and Globally Recognizable Avatar.

Dynamic Avatar greatly enhances the traditional avatar, not only allowing rich information presentation on the same piece of image, but also provide a centralized identity management system.

Davatar uses the technology of dynamically generating images on fly to give viewers different experience on each request.

Davatar is interesting and fun, and it is easy to create and use by anyone in the virtual world! It is mainly use for Forums post and Blogs comments.
