EZUpload

Hits: 7,068

Description: EZUpload allows you to upload files to your server. You can change the files that you allow to be uploaded. After a file has been uploaded then a link is created to view/play/run the uploaded file. A URL is also provided that you can use to copy and paste. The size of the file is also displayed and you have the option to delete the files. You can upload up to five (5) files at once and a progress bar is displayed for large files. You MUST have AspUpload installed on your server. Download the zip file and read the readme.txt file for installation instructions. No changes are necessary to get it running

BEWARE, Aug 17th, 2007

Reviewed By: bstender

I used it successfully for the last 3 years. its simple but functional. but it recently was hacked into and the author has ignored several please for help over several weeks.

i just switched to crush FTP, it is amazing and the author is super quick with support.
