Search Engine Composer

Hits: 1,236

Description: With three steps, Search Engine Composer will help you create a customizable search engine for your online web sites and CD/DVD ROMs at ease. It indexes your entire site or local file structure, and builds an efficient JavaScript, ASP or PHP search engine. The search engine works with Internet, intranet and CD/DVD offline search, and it also provides detailed visitors' search activities reports. The program is easy to use and offers a step-by-step interface and additional options to customize the search and result pages with use of templates. It supports indexing static HTML, dynamic HTML (ASP, PHP, CGI), XML, VML, Microsoft Word, PowerPoint, Excel, Adobe PDF and RTF files. It also supports excluding pages or part of a page from the search engine index.

Resource Specifications

Version:	5.3.11
