Affiliate Success: eBay

Hits: 9,094

Description: Affiliate Success: eBay is a one-of-a-kind PHP application that connects to eBay's web API to collect auction data and then displays these auction listings (eBay ads) on your website in plain-text. The plain-text auction data is awesome for search engine referrals. AS:e is also great to use with Adsense and Chitika and you will be surprised at how much more you can make with the eBay affiliate program. AS:e includes the Dynamic Web Generation framework. DWG can instantly create a 27,000 (one page/eBay category) page site filled with eBay auctions (requires mySQL.) Affiliate Success: eBay includes advanced caching, admin control panel to control all aspects of AS:e and DWG including your eBay affiliate ID, step-by-step guides for installation, joining eBay Developer Program (free) / Commission Junction (free), and usage and template design, API access; develop your own eBay web apps, free support / upgrades. Only basic HTML skills are needed to use AS:e.
