Chemdoc

Hits: 667

Description: Chemdoc is a computerized periodic table of elements that can aide in chemistry related calculations. Mass/Molar conversions, Concentration Calculations, and Stoichiometry are the tip of the ice berg. With the release of v1.0.0 new features include integrating ideal gas laws with the stoichiometric processes and balancing of chemical equations. GUI designed with wxWidgets so the source is very portable. A Pre-built win32 executable is available at each release point.

Resource Specifications

Version:	1.0.0
Platform(s):	linux, windows
