## Total SMEs Account System (Updated!) Hits: 4,302

**Description:** This accounting system also features the most accuracy in calculations plus the pre-entering warning function which allows careful decision making stage such as the amount of credit granted to purchasers/tenderer or even inventory system before purchasing and selling any. The accounting system supports any country's taxation system. Also features the capability of printing purchasing-selling taxes and inventory report. Unlimited users when accessing to the system at one time. Total SMEs Account System allows daily or monthly report of account receivable as well as account payables. The sale department must only enter journal & ledger entries accordingly and the system will do the rest. Designating the amount or rate of discount can also do on-sale items. Returned merchandise is allowable in the delivery bill and vice versa in term of reimbursement of merchandise. Added Pay-In model; Read Only Model; Fixed notify report...
