FastMySQL

Hits: 2,645

Description: This is a simple interface to a MySQL installation, written in PHP, that runs in any internet browser (well, Internet Explorer, Netscape, Firefox, and Opera anyway!). It is intended for the casual, occasional SQL user who does not have SQL statement syntax on the tip of their tongue (or the tip of anything else!) and does not wish to constantly refer to documentation for syntax for basic, common SQL queries. It is form driven and implemented in HTML frames.

Resource Specifications

Version:	0.10
