MultiMail

Hits: 629

Description: MultiMailer lets you mail a series of unlimited emails that are sent out to prospective customers/consumers over a period of time designated in days by you. Setup is as simple as it gets. Emails are highly customizable, just create them in a text editor and upload to your server. This is similar to the pay system at <http://www.aweber.com>, except that with them you only get a set amount of emails to send out. MultiMailer runs on your unix based webserver and allows you to send as many as you like every day of the year.

Resource Specifications

Platform(s):	linux
