## Flex PHPNews Publishing System

Hits: 24,855

**Description:** FlexPHPNews a simple, free and open source website news admin system. With this program, you can quickly add, delete or modify the news in the website according to your demand. You can add multi-level sub-categories and you can also upload pictures for the news. Users can search the contents of the news by keywords and also can rate for the news. All the text in this program is put in one file. Once you edit this file, you can generate a new language version or customize the text in your program. Before you install this system, please make sure that you have php and mysql installed and your const.inc.php and /photo/ is writable.

Flex News was very easy to set up. Had script running in minutes. Easy uploading of pictures for news submission articles. Very clean. Good Job.

**Very simple useful script.**, Sep 5th, 2007

If you need news script w\o user comments support, and each news can have 1 image, which can be uploaded to photos folder, this script is for you. Creates just 3 tables in MySQL, very easy to include in any PHP site. This is my choice for several sites.
