## Quezza - Upload, Install, Discuss

Hits: 5,706

**Description:** Quezza is professional grade bulletin board (forum) software at an open source price! Quezza strives to have all the features of commercial systems - but not charge you for it. It is released under the GNU GPL and is written in PHP, using MySQL as the database language. It is almost certain to run on your hosting. Just checkout the features below and see why Quezza should power your forum!

In addition, Quezza is open-source software so it has no fees, no subscriptions, and no restrictions on modifications. Couple this with a thriving and friendly Quezza community and you have a killer solution for creating communities on your site!
