Sonic Contact

Hits: 8,838

Description: New Features for Version 2.0.0: phpMailer integration, unlimited form fields with validation, improved captcha security, smtp authentication supported. Sonic Contact is a open source, web based, contact form that we developed. This form adds anti-spam, flexibility and security features that separate it from other contact forms. Features include:

Block Spammers by IP Address .

Block Spammers by Email Address. "Captcha" style security helps ensure a real person fills out the form. Cross domain security helps ensure that forms are filled out on your site and not sent from other sites.

Easy to customize the form fields as the processor handles all posted fields.

Custom routing system ensures contact forms are sent to the right person.

No database or programming experience required.
