Room Booking System for Schools

Hits: 3,138

Description: The Room Booking System is classroom management software specially designed for schools. It is intended in schools to replace spreadsheet, database or paper driven procedures. It allows teachers to reserve rooms within your school saving hassle and teaching time. It is possible to reserve any sort of room, such as conference suites, IT rooms, large halls and theatres. The administrator can easily supervise the system, observing the status of each room, and the amount of bookings each teacher has made. Contact us now on our website to request a free 30 day trial.

Resource Specifications
