### **Didn't work on my host**, Apr 6th, 2006

I bought Omnistar Mailer and spent a week working with their tech support to get it working. They had to make lots of tweaks just to get it to partially work. Finally, I just asked for my money back. The functionality seems pretty good but I didn't like the fact that it needed its own database to run (my host charges extra for more than one database and I was already running two scripts in one database). Also, although the tech support responded fairly quickly, they never really listened.

### **The Best Email Mailing List Manager Software!!!**, Jul 14th, 2006

I recently purchased the Omnistar Mailer email mailing list manager software, and I must say it's one of the best purchases I have made in a while. The program was really easy to install and setup and I was even able to easily import my existing mailing list. Within an hour I had created my campaign and was ready to send out my email to my list! Based on this great experience I will be looking at the other solutions Omnistar provides!

### **Great Piece of Software!**, Sep 5th, 2006

When I purchased Omnistar Mailer I quickly realized that it is really a great piece of software. It has more features than most of its competitors and is actually more affordable. Once I installed it, I was easily able to import my mailing list and build my email campaign using one of Omnistar Mailer's built in HTML Templates. You really cannot go wrong with this software.

**Tech Support Pathetic**, Nov 4th, 2008

Useless support provided by this company. Online support terrible, check with your host, check with your host, check with your host, is what they love to say. Answers all evasive no conclusion or direction. My host knows nothing about a strange program (GoDaddy).

My program I loaded and have it working fine but one of the items (scheduling to mail) is not functioning. I am sure eventually it will, but the support from this comp, sucks.

Product good not excelant, support sucks
