# WebMan

Hits: 1,230

**Description:** Website Protector is a new membership area webmasters dream come true. This script allows for super easy push button creation, editing, and deletion of .htaccess files with some super nice extra features such as image hotlink protection, ability to block domains from your site, ability to block referrers from your site, ability to set all your customized Error page settings, ability to create password files, add users to password files, and even change users passwords, all in an easy to use intuitive web interface.

## Resource Specifications
