## Article Script

Hits: 5,986

**Description:** From the creators of PHP Link Directory, the Article Script is an easy way to add content to your site, or allow others to submit content and watch your site grow.

Search Engine Friendly Pages - The directories and the articles use good page titles and urls to make it easy for search engines to index your site.

Uses the Fcked Editor - One of the most popular editors is now integrated into the script allowing easy cut and paste of formatted text. There is an option to use a simple editor or an advanced editor with more features. Create Categories - You can create an unlimited number of categories for your articles. Most Recent Articles are displayed on the homepage so search engines will quickly find the new content.

User Submitted Articles - By default user submitted articles are "locked" until approved by the administrator. In the admin panel, you can view the latest submitted articles and then unlock them if you like them or delete them. Much More!

## Reviews for Article Script

**Excellent! Excellent! Excellent!**, Jul 5th, 2007

Reviewed By: sheng326

The price for this script was very reasonable. I installed it, and customized the look a little, and now I have a great way for my customer to add articles to their site. I am planning to buy another copy to use on another customer's site, and also check out the other scripts from this company. Thank for the good script!!!
