Bad Support, worst script, Feb 23rd, 2006

Reviewed By: kvtcn80

I hope this review serves as a notification to all potential buyers. Their support is bad and what's worst is that their software is extremely buggggggggy. I have wasted so much time and money on this crap and I hope anyone will think twice before making a purchase from them.

problems....., Sep 20th, 2006

Reviewed By: rio602

I had nothing but problems with the admin Peter Soper, The code didnt work right from day 1, and he kept saying you will be updated. It should have been working on install or atleast soon after, but unstead I was told you will be updated after over a month of half way excuses. he makes empty promises and accuses you of messing up his code when it is encrypted. Be the judge for yourslef. if you want the emails that show my questions and his answers, email me at rio_602@yahoo.com I will be happy sd
