# ImageCompres

Hits: 341

**Description:** This is simply a system to scan your webservers harddrive and compress all images to the lowest possible filesize without losing all quality. It works in conjunction with ImageMagick and requires it to be installed on your server also. This script can easily be crontabbed to run at specific times of day or week or month, usefull for freehosts. It is one single script and runs fairly quickly on larger servers by our tests to date.
