# CreateWebApp Ajax Autocomplete Widget

Hits: 4,460

**Description:** Like Ajax autocomplete? Our widget is an elegant JavaScript component for developers whom want to make this feature available in their real world web applications. It's super easy to use, also looks great! Over one year development, nearly thirty release, our product has been verified by hundreds of clients: small firm, NASDAQ company, university, even police department!

Available on Mac and PC, supported web browsers include: Safari, Microsoft Internet Explorer and FireFox.
