I am computer programmer and my brother who owns a Hotel asked me to research about a good hotel software. I tried around 8 different software and eZee was one of the best amongst the best. The software download size was too much, but I couldn't believe how easy it was to use. All the basic features required for my brother's hotel seemed to be covered quite well. The email response time from their support team was quite less. The price was a bit high compared to some of other cheaper options.
