Softcomplex CMS

Hits: 2,744

Description: Softcomplex CMS (SCMS) is the web application designed to simplify the static content management of the websites. The content is described in secure administrative interface as the hierarchy of folders, documents and includable text fragments mirroring the logical and physical structure of the website. The documents are then generated according to the described rules and saved in the file system of the website. Using static files ensures best performance possible and best search engine rating.

Resource Specifications
