I've finally found the ideal classifieds script for my needs! Fast to install, easy to manage and very user friendly. The option to add lots of categories, subcategories, regions and cities is great! The PayPal payment option is already integrated in the script. The team also offers a really good support and is of great help regarding the customization of the script. Related to other classifieds script available, this one has a good quality/price ratio. Up to now, I haven't found any bugs.

Take it from this totally new user. I was impressed with the script, and just as impressed by the service Davis provided. I had half of an idea that I wanted to wrap around this script and Davis made it perfect. I didn't have a ton of money to try this idea and checked a lot of scripts of this type. This xzeroscript delivered as promised. Just as important as the front page, the admin controls give me great control to try things. You won't regret it. Thanks Davis.

I searched for over 2 years to find a good craigslist clone script. This script offers a powerful backend with a simple user interface. I have been running classified sites for over 3 years now, and the biggest breaker of any classified site is having your users register or signup. This scrip allows users to submit a photo ad without having to register. From my experience this has increased posts on my sites by 90%.

The Script is super easy to install & configure

The interface can be modified but is incredibly user friendly by default

Super cheap script

Support answers all your questions

Cons:

You can't choose a different image rather than the default folder for categories. Which limits your graphic design

Second: Even-though you can translate the interface, you can only show the site in one language, if you try to show in two, it would look into different categories/adverts

But I am happy with it.
