Improved Unobtrusive Javascript Image Rollovers Hits: 2,369

Description: Use this script to create image rollovers for your navigation without hard-coding any Javascript into the HTML on your web pages.

This makes it easy to put your navigation into an include and make site-wide updates to your navigation in no time at all.

This script is easy to implement, even for beginners and works across all browsers and degrades nicely for visitors with Javascript turned off.

Resource Specifications

Version:	1.0
