Myspace Bot Friend Adder Application

Hits: 3,292

Description: Target your marketing based on age, gender, geographic location, interests, and more. Gather friend ids from browsing, groups, forums, friend lists, or any other area of MySpace™. Optionally add a message to friend requests to increase the number of accepted requests. Option to disable browser images for increased performance. Doesn't send friend requests to the same MySpace™ member twice or to your existing friends. Unsent friend ids that have been gathered are saved and carried over to the next time you run MySpace™ Friend Adder. Tracks and displays number of friend requests sent per day and for all time. Works with multiple MySpace™ login names, tracking friend requests separately. Free product updates and technical assistance for life. Software is available for PC only.

Resource Specifications
