# JobList

Hits: 539

**Description:** JobList is the perfect job listing management solution for updating and editing job postings on your website. It's so quick and easy, you will never have to make tedious HTML changes to update your job postings again - JobList does it all for you. You simply log in through a secure password protected log in screen, enter in the details of the job such as the job title, category, and description, of your job posting and hit the add listing button, then rebuild html pages. The new job posting is instantly posted in your websites job section.
