Public Access Desktop

Hits: 750

Description: Make a foolproof public access workstation, protect the critical files, and manage applications to be run. You can create an Internet Kiosk for cybercafe, library information terminal, in-store terminal or restrict children activities on home PC, etc. Set the proper type of access to a locked desktop such as user-name and password authentication, time-locked code (that allows users to access PC for a given period only) or a combination of both.
