TimberWolf Content Management

Hits: 5,647

Description: GZR™ TimberWolf is a content management system featuring User registration, private messages between members, very easy skinning capabilities, and quite a lot of ease in usage. It has a very simple backend, yet a very stunning frontend.

Administrators have the ability to create pages, add/edit/delete content and members, customize their website, and much more.

Users have the ability to edit their own profile, send/receive private messages, and if part of the staff, write articles, and much, much more.
