FMDeluxe

Hits: 22,805

Description: FMDeluxe is a powerful PHP based file/download management system created for webmasters to allow members, users and guests to download files from your website with ease. FMDeluxe features an extensive administration backend with great tools such as user management, file management upload approval, SQL based template editing and more. As well as its administration panel, FMDeluxe has a great front end which is extremely easy to customize to your liking... Within minutes you could have yourself a professional, fast, and secure download manager. Easy to setup, installs in under 2 minutes!

Amazing, Apr 13th, 2006

Reviewed By: Ookware

I started off looking for a replacement for paFileDB which, while good, was hard to fit into my site template. In a short time I had FMDeluxe edited to my liking sitting in my site template working brilliantly.

Looks good, acts good, and best of all is easy to use.

Best of the GPL download managers I've tried, Sep 7th, 2007

Reviewed By: acalsop

I've tried a bunch of download managers (one of them paid which still won't install). This one installed easily and works just as I would expect it to. Great app!
