PSPad editor

Hits: 3,124

Description: PSPad editor is a programmers editor with support for multiple syntax highlighting profiles. It comes with a hex editor, CP conversion, text differences, templates, macros, spellcheck option, auto-completion, Code Explorer and much more. The program is pre-configured for the most popular programming languages (VB, C++, SQL, PHP, ASP, Python etc.) and you can further customize the syntax settings. PSPad includes several additional tools that are especially useful for HTML editing (compress, format code) and also integrates TopStyle Lite and TidyHTML. The program can be used as IDE for any compiler. Additional features include support for project, file browsing, custom shortcuts, built-in FTP client to edit files on the server and much more.

I have to say that PSPad is excellent - I'm VERY glad I found it and use it for editing everything - from HTML to CSS to PHP. If you could find a FREE text editor that does more than PSPad, I'd say you're joking. PSPad has helped me, and I'm sure it'll help you.
