Fast Track Sites Simply Secure Forum FREE Edition

Hits: 5,504

Description: Fast Track Sites developed the Simply Secure Forum (SSForum) system to be a replacement for Invision Power Board, phpBB, and other bulletin board systems, sometimes known as bbs or forums. SSForum was designed to have the best features of all of these programs, and to also contain even more original features added in.

The FREE version of SSForum has several features that make it a fully functional and customizable forum. It includes a few of the original items that only SSForum comes with by default. The professional version comes with three skins, or themes if you will, that will give you a basic idea on how to make new ones.

The professional version includes a 1yr warranty with full access to technical support by phone or email, ranking systems, user groups, moderators, smilies, a better admin panel, and much, much more.

Resource Specifications

After trying and downloading FTS's SSForum i just had to try it out, i tried everything to hack, break or do anything to show a security breach in this script, and when i did find one and told spyke(the owner of FTS) it was fixed without delay and the download updated quickly. if your looking for a quick and simple forum system, this is the one!
