# openPopUps - DHTML Unblockable Pop-up Hits: 7,398

**Description:** Do you need a DHTML powered pop-up window for your website advertisements or custom web application? Look no further, openPopUps is the answer. openPopUps is the perfect solution for launching new pop-up windows on your website or in your web applications. Completely JavaScript and DHTML powered, openPopUps can be set up and running in no time. openPopUps can be used in your custom web applications or for your site's advertisements. Because openPopUps generates a DHTML pop-up window, pop-up blockers will fail to prevent it from launching.
