SolidState

Hits: 21,202

Description: SolidState is an open-source web-based billing and customer management solution for web hosting providers. It is written in PHP, uses MySQL, is fully templated with Smarty templates, and is built on-top of a modular framework with support for third-party payment gateways and domain registrars. SolidState includes two interfaces: an order/signup interface for new and existing customers to place orders for hosting services and domains, and a manager interface for administering customers, services, and orders.

Features include:

- * Open Source (GPL)
- * PHP / MySQL
- * An easy to customize interface for accepting orders from new and existing customers
- * Smarty templates
- * Modular framework, including modules for:
 - * Authorize.net (payment gateway)
 - * Paypal (3rd party payment processor)
 - * Reseller Club (domain registrar)
- * I18n support, including translations for: English, Portuguese, and Italian

SolidState Interesting, Aug 22nd, 2008

Reviewed By: rblanc

This site is not quite ready - I have visited it on Aug 21, 2008. Just wonder how long are they going to be getting this site up. The open source project seems to be interesting, will revisit.
