# Vlog System

Hits: 3,462

**Description:** Vlog System is a video blog hosting software product written in php, which allows you to launch professional looking vlog portals offering rich functionalities to the users to create and maintain their own video blogs. Vlog System has been created as extension of Blog System, one of the world's leading blog hosting products for small and medium size blog communities and that's why it has all the standard functionalities of Blog System. In difference of Blog System, Vlog System ads the possibility for uploading video files and show them inline with the notes content. Please visit our website for more information and online demos.
