# PHP Counter

Hits: 24,246

**Description:** A very nice little counter script as used on this site!  
Its very customisable you can have 12 different graphic styles or just text..  
If there is a part of it you don't want to use you can just switch if off.. \* Easy to install.

- \* No database needed as it is a flat file system.
- \* You can display the counter in text or graphic format.
- \* valid XHTML 1.0 and CSS.
- \* Hit or visit counter.
- \* User's online.
- \* Page load time.
- \* 12 image styles to choose from (more coming soon).
- \* Counter can be set as Horizontal or Vertical.
- \* Language system with 5 different language's to choose from :: english :: french :: spanish :: german :: dutch ::.
- \* Full CSS system for ease of adjusting the the look of it.
- \* Lots of settings for ease of customization.

And lots more!
