Short URL Script

Hits: 7,283

Description: Short URL allows you to create shorter URL's and keeps track of how many times a link has been clicked. It's useful for managing downloads, keeping track of outbound links and for masking URL's.

You could use it to turn this;
`http://www.yoursite.com/g oing/to/downloads.zip`
to this;
`http://www.yoursite.com/u .php?9`

Features include a simple password protected admin page which allows you add, edit and delete redirecting URL's as well as clear the counters for every link. You can also add a descriptive note to each redirect. Any questions can be asked on the Short URL FAQ page.

Resource Specifications

Version:	2.0
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	Mar 28th, 2006
Last Updated:	Aug 3rd, 2007
