AF Live Support

Hits: 2,788

Description: Whether you are a small business or a large company, you can dramatically increase sales and improve customer service using live support software. Your website will become an interactive experience for all of your visitors. Live Support also allows you to watch visitors on your website in real-time and even invite them to speak with your customer support representatives. It is very easy to get started and installation is as easy as inserting a line of JavaScript in to your web pages.

We have the most feature rich free account in the industry. Our solutions are hosted and maintained on our servers, which means that you will always have the most current and updated version of our software. Since our service is 100% online, you will not have to install any complex programs, download any software, or use any of your website's valuable bandwidth.

Resource Specifications
