Hi everyone, I like to say this is the best simple guestbook on internet. Is really easy to change the look and feel, easy admin, and the most important part: the option to approve all comments before display.

i tried many scripts and always I've the same problem: I cant put my design.

the problems with this programs are: some open sessions (but is really easy to fix) and the install.php not work for me, I must to setup my database manually.

Thanks for this excellent scripts
