Great Script, Apr 18th, 2006

Reviewed By: BillCherryAtl

I've search through all 29 pages of .php News script and this one had the 'cleanest' look with a great deal of flexibility. You can add your news into an existing .php page designed to fit your likes & needs.

Perhaps one of the greatest bonuses is the author is very willing to answer questions and help in a very timely manor. I'm most pleased. Give it a go.

Best news script I've seen, Jul 16th, 2006

Reviewed By: Aralll

This is the best script I've ever seen. It's very easy to instal, and it's very easy to make it fit into your site (i didn't have to change ANYTHING to make it look great on my site). And the best thing is that i can add news from any computer, very fast and very easy. I had v.1 before but i just updated to v1.2 and I'm impressed. The category thing he's added is great, but if you don't want it, it's just to ignore it. Thanks for this great piece of work!
