It's really very helpful for us. You have lots and lots of stuffs. Please try to make all your provider for free. If you provide for free, then many members will visit and get sign in to your site and you could get lots of user. And you many have more users with you. Then in future many companies will come forward to sponser on your HotScript and you could benefit lots of things. This is my wish and please revise to provide all useful stuffs for free download instead of charging for that. Thanks
