s@rdalya - s@rm@l dynamic framework Hits: 1,180

Description: s@rdalya, is a cross-browser compatible system which is designed to work in all DOM-supporting browsers.

s@rdalya has been tested with internet explorer 6, netscape navigator 6-7-8beta, Mozilla 1.5-FireFox 1.0.3, Opera 7.0-7.2-8Beta and more.

At the beginning, s@rdalya started his life as a small API, mostly driven by the dynamic html programming and scripting needs in my projects. Nevertheless, today1, it can stand on its own feet and may be useful to others. So here it goes.

Resource Specifications

Version:	2.1.1
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	Apr 15th, 2006
Last Updated:	Apr 15th, 2006
Author:	Volkan Ozcelik
