WinSmit Menu Builder for AIX Version 2

Hits: 797

Description: WinSmit is a Windows based software the allows the administrator of an AIX system to build IBM AIX System Management Interface Tool (Smit) style menus using a Windows GUI. The file can then be exported (ftp) to an AIX system and imported into the AIX ODM database to create a new AIX Smit Menu.

Perfect if you want to consolidate all your AIX scripts in one place

NEW:

The new Version 2 includes a message file creation tool plus a number of bug fixes.
