Shared Monitor

Hits: 589

Description: Shared Monitor is an advanced shared resource monitor and logger. The program sits in your system tray and constantly monitors all the Microsoft Network connections. It allows you to monitor active connections to your resources and browse the historical data. In addition, you can generate HTML reports, set alerts on specific events (for example, when a new computer connects to your resources) and run the program automatically on Windows start.

Resource Specifications

Version:	1.0
