Quick Rates add-on for LiteCommerce

Hits: 501

Description: Quick Rates add-on for LiteCommerce enables real-time shipping rates estimation prior adding products to cart and/or logging in!

If you have real-time shipping rates enabled in your LiteCommerce store, potential buyers can leave your shop because of having to enter full shipping address just to estimate the delivery. Quick Rates aims to allow shipping estimation by destination zip code and state. Your customers will be able to get complete list of available shipping methods with real-time shipping rates for the items in the shopping cart. They will also have the ability to estimate the shipping fee for every item by clicking the "Rate" button next to each product. Moreover, it's possible to quote shipping charges without even adding an item to the cart.

Resource Specifications
