SMS Text Msg script with auto network locator Hits: 2,452

Description: Here is a powerful script written to give web site owners the ability to offer their visitors FREE or PAID sms text messaging ability. The script is unique in that it does not require the visitor/user to know the network of the cell phone number they are text messaging to. All they need to know is the 10 digit cell phone number and the script will find that cell phone anywhere in the USA, and deliver the text message to it. SMS is huge and this is a great feature to offer your website visitors, and a sure way to drive repeated traffic to your website. The script is easy to install and requires PHP4+. It installs seamlessly into your website and is very light weight with NO heavy server load requirements. It is secure and incorporates multiple levels of security and abuse checks. This script is ION CUBE ENCODED.
