cPanel Proxy

Hits: 2,707

Description: This script is made for people who use cPanel. Its purpose is to give access to cPanel (including webmail and WHM) at port 80 by acting like a proxy. (For people behind strict firewalls.) It can be installed by server owner, reseller or end-users.

[cPanel Proxy](#)

Webmail Anywhere, May 22nd, 2007

Reviewed By: sanderth

This script really is wonderful; I'm now able to view my webmail anywhere. Even at school, which is really good because the schools firewall blocks almost everything.

Installation is simple and done in a few minutes, just don't forget to upload the .htaccess, otherwise it won't work.

Conclusion: nice little script that does exactly what you want it to do, no more and no less.
