MapCal

Hits: 6,508

Description: MapCal is a mapping event calendar. It has the ability to add/modify/delete events and show them on a list like other event calendars. The difference with MapCal is that it also shows your events on an embeded Google Map. This works great for things like a motorcycle club, or a craft show exhibitor. Any place you want to show events and their locations. MapCal uses PHP and MySQL. PHP 5+ is required.
