# Hospital Management System

Hits: 1,689

**Description:** Pegasus's Healthcare System (PHS) consists of software mechanism that centralizes and consolidates patient, provider and clinical objects and business rules across the enterprise. PHS overcomes operational challenges faced by healthcare organizations, letting them:

- Manage business transactions consistently in the patient care process, thereby increasing the efficiency, quality and competitive edge of the organization
- Maximize clinical data reuse and portability through the use of standards, enabling seamless integration and consistent implementation between variant healthcare information systems
- Enable protocol-based decision support, based on a complete view of patient information
- Enables caregivers in providing flexible solutions with the User-friendly Interface
