Send Personally for Outlook Express

Hits: 786

Description: Send Personally for Outlook Express allows to send messages to a great number of recipients from Microsoft Outlook Express. Plug-in adds a new button "Send Personally" to the toolbar and offers an alternative method of sending messages from Outlook Express - separate messages for each recipient. The final recipient will not receive any information about any other recipient: he/she will see only his/her name and address in the "To" field.
