## Docebo CMS

Hits: 5,234

**Description:** Docebo CMS (Content Management System) is an integrated content management system especially dedicated to teaching. It can work alone and can also work with the brother project docebo LMS (e-learning platform) . WCAG II is supported for accessibility. Pages can be organized in a multi-language tree and every page can be optimized for search engine optimization trough mod\_rewrite.

NOTE: Is written by scretch, it is not a FORK.
