Great flash charts and world map of visitors, Sep 4th, 2006

Reviewed By: irisacc

I like Apolofind counter, especially the flash charts. I can easily see all of my stats on one single page powered by flash technology. This helped me analyzing my website traffic big time. The world map with zoom functions is a cool free add-on. I was able to see all of my website visitors cities in seconds. Definitely recommended. Rating: 5
