Proxifier

Hits: 8,829

Description: Proxifier is an easy to install three tier Web proxy. Its features include the ability to remove cookies, the HTTP referer field, the HTTP user-agent field, scripts on the page, and objects, altering the user-agent string to whatever you please, and tunnelling your proxied traffic through a second proxy.

Brilliant piece of work, Aug 19th, 2006

Reviewed By: hennier

Wow, this is an excellent piece of work:

1. It is the only php web proxy that worked on my server.
2. It does much more than I expected.
3. Graphics seem to work fine.
4. I can click on links without leaving the proxy.
5. It is not just a demo like some of the other web proxies. The php file is given directly.
6. Oh, and I almost forgot: It is the easiest script I have ever installed. You don't have to do nothing to it. Just chuck it in your web directory.

Thank you mister Cable, sir.
